Ladies and Gentlemen:

**Subject:** Notice in accordance with Section 8 (e) - Results of an acute toxicity study in Algae (*Desmodesmus subspicatus*) with 1,3-propanediamine, N,N-dimethyl-, reaction products with benzene-methanamine and polyepichlor-hydrin, hydrochlorides

BASF Corporation is submitting results of an acute toxicity test with 1,3-propanediamine, N,N-dimethyl-, reaction products with benzene-methanamine and polyepichlor-hydrin, hydrochlorides (CASRN: 480427-73-4) in Algae (*Desmodesmus subspicatus*) conducted by BASF Aktiengesellschaft, Ludwigshafen, Germany. The test was conducted in a static system over 72 hours according to the following test guidelines: EEC Directive 92/69/EEC, Annex V, Part C.3. Algal inhibition test, updated 29-December-1992; OECD Guideline for Testing of Chemicals, No. 201 (June 1984): Algal growth inhibition test; and EPA Ecological Effects Test Guidelines. OPPTS 850.5400 (Public Draft, April 1996): Algal Toxicity, Tiers I and II. The following nominal concentrations (mg/L) were tested: 0 (control), 10, 1, 0.1, 0.01, 0.001, 0.0001, and 0.00001.

### Results

The following nominal effect concentration (mg/L) was obtained based on nominal concentrations:

$$E_b C_{50} (72 \text{ h}) = 0.065 \text{ mg/l}$$

Although the findings are not considered to present a substantial risk to human health or the environment, BASF Corporation understands that reporting of results from this study under TSCA 8(e) is in accordance with EPA's policy. Please note that BASF Corporation does not currently manufacture, process or distribute this chemical in the United States.

Very truly yours,

BASF CORPORATION
